

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control		
LLIN financing 2020 projection (% of need)	84	
Public sector RDT financing 2020 projection (% of need)	53	
Public sector ACT financing 2020 projection (% of need)	100	
World Bank rating on public sector management and institutions 2019 (CPIA Cluster D)	2.5	
Insecticide Resistance Monitoring, Implementation and Impact		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	1	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>9 months stock)		
ACTs in stock (>9 months stock)		
LLINIRS campaign on track		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Scale of implementation of iCCM		
Operational LLINIRS coverage (% of at risk population)	100	
On track to reduce case incidence by $\geq 40\%$ by 2020 (vs 2015)		
On track to reduce case mortality by $\geq 40\%$ by 2020 (vs 2015)		
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2019)	68	▲
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2019)	60	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2019)		
% deliveries assisted by skilled birth attendant	82	
Postnatal care (within 48 hrs)	49	
Exclusive breastfeeding (% children < 6 months)	11	
Vitamin A Coverage 2018 (2 doses)	11	
DPT3 coverage 2019 (vaccination among 0-11 month olds)	91	

Most of the population of Comoros is at risk of malaria. Transmission is perennial on the Island of Grand Comore and unstable throughout the zones of Anjouan and Mohéli. The annual reported number of malaria cases in 2019 was 17,697.

Malaria

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic is putting an incredible strain on health systems across Africa. Health systems are required to maintain routine health services for other illnesses even as they handle the additional burden. In order to prevent widespread morbidity and mortality, it is of vital importance that we work to sustain the delivery of essential life-saving interventions during this difficult time including for Reproductive, Maternal, Newborn, Child and Adolescent health, Neglected Tropical Diseases and malaria.

For Comoros, it was of vital importance to ensure that the universal coverage campaign for long-lasting insecticidal nets (LLINs) scheduled for 2020 went ahead, whilst taking into account physical distancing, in accordance with the recent guidance and recommendations from WHO and the RBM Partnership to End Malaria. The country is congratulated for successfully completing the LLIN universal coverage campaign in Q3 2020. Without this, coupled with the need to sustain essential health services including malaria case management, there would have been an increase in malaria cases and deaths.

It is essential to ensure the continuity of malaria, RMNCAH and NTD services in 2021 as the COVID-19 pandemic continues to impact our continent. This may include the implementation of any necessary catch-up activities and ensuring timely planning to account for potential delays in procurement and delivery. Any intervention must ensure the safety of communities and health workers given the ease of transmission of COVID-19.

The Global Fund

The Global Fund has announced that Comoros will receive €6.4 million for HIV, tuberculosis, malaria, and health systems strengthening as the country allocation for 2021-2023. The Global Fund has determined the total allocation amount based on Comoros's disease burden and income level, as well as several other factors. The malaria component is also allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Comoros this is calculated at €4.8 million. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Comoros is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation, as well as from domestic resources, to accelerate progress.

Progress

Comoros has secured the required resources for the required LLINs and ACTs in 2020, and has good stocks of ACTs, RDTs and LLINs. WHO has identified Comoros as being a country with the potential to eliminate local transmission of malaria. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. The country has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2019 was 17,697.

Key Challenges

- Insufficient human resources and a limited number of partners to implement malaria control activities.

- Gaps in funding to allow larger scale IRS.
- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure the GF malaria funding application is submitted by Q2 2021 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q2 2021		Deliverable not yet due
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2020		Comoros reports that there are sufficient antimalarial commodities in the country. The LLIN campaign was completed in Q3 2020. There were reports of less malaria testing as a result of fewer people going to health facilities during the COVID-19 lock-down, as well as reports of increased ACT use however community health workers are stationed at community level and provided malaria diagnosis

The country has responded positively to the recommended actions addressing CPIA cluster D and development of a national insecticide resistance monitoring and management plan and continues to track progress as these actions are implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Impact	Investigate and address the reasons for the increase in estimated malaria incidence between 2015 and 2019, which means that the country is not on track to achieve the 2020 target of a 40% reduction in malaria incidence	Q4 2021

RMNCAH and NTDs

Progress

The country has achieved high coverage in the tracer RMNCAH intervention skilled birth attendants and DPT3 coverage.

Progress in addressing Neglected Tropical Diseases (NTDs) in Comoros is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis and soil transmitted helminths. Preventive chemotherapy coverage in Comoros is good for both soil transmitted helminths (73%) and lymphatic filariasis (64%). Overall, the NTD preventive chemotherapy coverage index for Comoros in 2019 is 68, which represents a substantial increase compared with the 2018 index value (0).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Optimise quality of care	a) Address the falling coverage of vitamin A	Q1 2021		Deliverable not yet due
	b) Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2020		No progress reported

Comoros has also responded positively to the RMNCAH recommended actions addressing exclusive breastfeeding, as well as lack of data on ART coverage in children, and continues to track progress as these actions are implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
NTDs	Ensure that NTD interventions including Mass Drug Administration, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritising key necessary catch-up activities	Q4 2021
