

Cameroon ALMA Quarterly Report Quarter One, 2018

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control	
LLIN financing 2018 projection (% of need)	36
Public sector RDT financing 2018 projection (% of need)	100
Public sector ACT financing 2018 projection (% of need)	100
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.0
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Reduced Malaria Incidence by >40% by 2020 (vs 2015) (projected)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	58
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	37
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	18
% deliveries assisted by skilled birth attendant	65
Postnatal care (within 48 hrs)	65
Exclusive breastfeeding (% children < 6 months)	28
Vitamin A Coverage 2015 (2 doses)	99
DPT3 coverage 2016 (vaccination among 0-11 month olds)	85

Malaria transmission occurs year-round in Cameroon and is most intense in the south of the country. The annual reported number of malaria cases in 2016 was 1,790,891 with 2,639 deaths.

Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data
	Not applicable

Malaria

Progress

Cameroon secured resources to cover the costs of the ACTs and RDTs needed in 2018. The country has distributed sufficient LLINs to achieve universal operational coverage. Cameroon has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Cameroon has significantly enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control Scorecard.

Impact

The annual reported number of malaria cases in 2016 was 1,790,891 with 2,639 deaths.

Key Challenge

- Ensuring domestic resources for malaria control are sustained and increased.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Financing	Address the funding gap needed to sustain routine LLIN distribution	Q4 2018

MNCH and NTDs

Progress

The country has achieved high coverage in the tracer MNCH intervention vitamin A.

Progress in addressing Neglected Tropical Diseases (NTDs) in Cameroon is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Cameroon is high for onchocerciasis (75%) and schistosomiasis (77%), and good for lymphatic filariasis (71%) and soil transmitted helminths (61%); however, coverage for trachoma is low (26%). Overall, the NTD preventive chemotherapy coverage index for Cameroon in 2016 is 58 and this represents a substantial increase compared with the 2015 index value (20).

Previous Key Recommended Action

The country has responded positively to previous recommended action on accelerating coverage of ARTs in the total population and in children under 14 years of age.
