<div style="width: 0%;"></div>	Not applicable

Malaria

Progress

Comoros has achieved 100% operational coverage with LLINs. The country secured sufficient resources for the required LLINs, ACTs and RDTs in 2018. WHO has identified Comoros as being a country with the potential to eliminate local transmission of malaria by 2020. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Comoros was awarded the 2018 ALMA Award for Excellence for being on track to achieve a more than 40 percent drop in cases by 2020. The country has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2015 was 1,333 with 0 deaths. WHO projects that the country is on track to reduce malaria cases by greater than 40% by 2020.

Key Challenge

- Insufficient human resources and a limited number of partners to implement malaria control activities.
- Gaps in funding to allow larger scale IRS.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Vector Control	Develop and implement a national insecticide resistance monitoring and management plan	Q1 2017		The country reports that the insecticide resistance monitoring and management plan is being finalized and will be completed by end of 2018

The country has responded positively to the recommended actions addressing CPIA cluster D and continues to track progress as these actions are implemented.

MNCH and NTDs

Progress

The country has achieved high coverage in the tracer MNCH intervention skilled birth attendants and DPT3 coverage.

Progress in addressing Neglected Tropical Diseases (NTDs) in Comoros is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis and soil transmitted helminths. Preventive chemotherapy coverage in Comoros is low for both lymphatic filariasis (0%) and soil transmitted helminths (0%). Overall, the NTD preventive chemotherapy coverage index for Comoros in 2016 is 0, which represents no change compared with the 2015 index value (0).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	Report on coverage of ARTs in the total population and in children under 14 years of age	Q1 2017		The country reports ART coverage in the total population at 27%, an increase of 3%. Comoros is working to scale up ART coverage including through strengthening HIV testing, training providers at all levels, ensuring an uninterrupted supply of drugs and setting up the psychosocial and nutritional care programme. The country is delegating prescribing and enhancing communication support by educating PLHIV through discussion groups run by CSOs and peer educators

Comoros has responded positively to the NTD recommended action addressing low coverage of NTD preventive chemotherapy, and continues to track progress as these actions are implemented. Comoros has also responded positively to the MNCH recommended actions addressing low coverage of vitamin A and exclusive breastfeeding and continues to track progress as these actions are implemented.
