

## Scorecard for Accountability and Action

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2015 was 3,606,725 with 2,604 deaths.

### Metrics

Commodities Financed and Financial Control	
LLIN financing 2017 projection (% of need)	100
Public sector RDT financing 2017 projection (% of need)	100
Public sector ACT financing 2017 projection (% of need)	95
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.2
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2016)	
Operational LLIN/IRS coverage (% of at risk population)	100
Estimated change in malaria incidence rate (2010–2015)	
Estimated change in malaria mortality rate (2010–2015)	
Tracer Indicators for Maternal and Child Health	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	▲ 41
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	25
% deliveries assisted by skilled birth attendant	59
Postnatal care (within 48 hrs)	70
Exclusive breastfeeding (% children < 6 months)	12
Vitamin A Coverage 2014 (2 doses)	99
DPT3 coverage 2016 (vaccination among 0-11 month olds)	▲ 96

## Malaria

### Progress

Côte d'Ivoire has successfully raised resources for the financing of the required number of LLINs, RDTs, and ACTs in 2017 and has procured enough LLINs to achieve universal coverage of LLINs in 2017. The country has also scaled up implementation of iCCM and achieved operational universal coverage of LLINs. Côte d'Ivoire has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

### Impact

The annual reported number of malaria cases in 2015 was 3,606,725 with 2,604 deaths. WHO estimates that the country has achieved a decrease of 20-40% in the malaria incidence rate and a decrease of greater than 40% in the malaria mortality rate for the period 2010 - 2015.

### Key Challenge

- Securing longer term resources for malaria programming.

### Previous Key Recommended Action

Côte d'Ivoire has responded positively to the recommended action on the monitoring of national insecticide resistance.

### New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address Funding	Work to accelerate the signature of the GF grant	Q4 2017

## MNCH

### Progress

The country has made progress on tracer MNCH interventions, with high coverage of vitamin A and has recently increased coverage of DPT3 and ARTs in the total population. Côte d'Ivoire has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

### Previous Key Recommended Actions

Côte d'Ivoire has responded positively to the MNCH recommended action addressing low coverage of exclusive breastfeeding and accelerating coverage of ARTs in children and continues to track progress as this action is implemented.
