

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control

LLIN financing 2018 projection (% of need)		
Public sector RDT financing 2018 projection (% of need)		5
Public sector ACT financing 2018 projection (% of need)		98
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)		

Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		2
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)		41
Reduced Malaria Incidence by >40% by 2020 (vs 2015) (projected)		

Tracer Indicators for Maternal and Child Health and NTDs

Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)		0
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)		38
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)		17
% deliveries assisted by skilled birth attendant		68
Postnatal care (within 48 hrs)		
Exclusive breastfeeding (% children < 6 months)		7
Vitamin A Coverage 2016 (2 doses)		
DPT3 coverage 2017 (vaccination among 0-11 month olds)		25

The entire population of Equatorial Guinea is at high risk of malaria and the transmission is intense all year round. The annual reported number of malaria cases in 2016 was 147,714 with 109 deaths.

Malaria

Progress

Equatorial Guinea has made progress with malaria control on Bioko Island and is working to extend this success to the mainland. The country has completed the national insecticide resistance monitoring and management plan. The country has committed the majority of the resources required for ACTs.

Impact

The annual reported number of malaria cases in 2016 was 147,714 with 109 deaths. With the overall increase in malaria cases between 2010 and 2016, WHO projects that the country will record an increase in malaria incidence by 2020.

Key Challenge

- Lack of resources to achieve universal coverage of malaria control interventions.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure that sufficient domestic resources are committed to malaria control	Q4 2014		The country is planning a high level meeting in 2019 to enhance resource mobilisation and domestic resource commitments
Impact	Investigate and address the reasons for the increase in estimated malaria cases 2010-2016	Q4 2018		Deliverable not yet due

Equatorial Guinea has responded positively to the previous recommended actions addressing low coverage of iCCM and the lack of insecticide resistance monitoring data and continues to track progress as these actions are implemented.

MNCH and NTDs

Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Equatorial Guinea is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis and soil transmitted helminths. Preventive chemotherapy coverage in Equatorial Guinea is low for all four NTDs present in the country (0% for each). Overall, the NTD preventive chemotherapy coverage index for Equatorial Guinea in 2016 is zero, which represents no change compared with the 2015 index value (0).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
NTDs	Initiate Preventive Chemotherapy for Lymphatic Filariasis, Onchocerciasis, Schistosomiasis and Soil Transmitted Helminths. For Onchocerciasis, conduct elimination mapping on the mainland	Q4 2018		The country is preparing to roll out preventive chemotherapy for Soil Transmitted Helminths, Schistosomiasis and Lymphatic Filariasis and is planning the procurement of medicines, training of drug distributors, social mobilization, drug administration and monitoring and evaluation. A mission is planned for in July to survey for the presence of the blackfly vector of Onchocerciasis on Bioko island
MNCH ¹ : Optimise quality of care	Investigate and address the reasons for the decreasing coverage of postnatal care	Q4 2015		No progress reported

Equatorial Guinea has responded positively to the MNCH recommended actions addressing lack of data on vitamin A and low coverage of exclusive breastfeeding and DPT3. The country continues to track progress as these actions are implemented, and the country has recently increased DPT3 coverage.
