

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control	
LLIN financing 2019 projection (% of need)	0
Public sector RDT financing 2019 projection (% of need)	
Public sector ACT financing 2019 projection (% of need)	
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	2
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of ICCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	27
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)	38
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)	17
% deliveries assisted by skilled birth attendant	68
Postnatal care (within 48 hrs)	
Exclusive breastfeeding (% children < 6 months)	7
Vitamin A Coverage 2016 (2 doses)	
DPT3 coverage 2017 (vaccination among 0-11 month olds)	25

Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data
	Not applicable

The entire population of Equatorial Guinea is at high risk of malaria and the transmission is intense all year round. The annual reported number of malaria cases in 2017 was 15,725.

Malaria

Progress

Equatorial Guinea has made progress with malaria control on Bioko Island and is working to extend this success to the mainland. The country has completed the national insecticide resistance monitoring and management plan. Equatorial Guinea has decreased the estimated malaria mortality rate by more than 40% since 2010.

Impact

The annual reported number of malaria cases in 2017 was 15,725.

Key Challenge

- Lack of resources to achieve universal coverage of malaria control interventions.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure that sufficient domestic resources are committed to malaria control	Q4 2014		The country is planning a high level meeting in 2019 to enhance resource mobilisation and domestic resource commitments
Vector Control	Address the decreasing LLIN coverage	Q3 2019		Deliverable not yet due

Equatorial Guinea has responded positively to the previous recommended actions addressing low coverage of iCCM and the lack of insecticide resistance monitoring data and continues to track progress as these actions are implemented.

RMNCAH and NTDs

Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Equatorial Guinea is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis and soil transmitted helminths. The country has not reported preventive chemotherapy coverage in 2017 to WHO.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
NTDs	Initiate Preventive Chemotherapy for Lymphatic Filariasis, Onchocerciasis, Schistosomiasis and Soil Transmitted Helminths. For Onchocerciasis, conduct elimination mapping on the mainland	Q4 2018		Equatorial Guinea did not carry out PC in 2017. In 2019, the country has received the Albendazole required for the mass drug administration for Soil Transmitted Helminths. For Schistosomiasis and Lymphatic Filariasis, the country will request support from ESPEN for medicines, training of distributors, social mobilisation, administration of medicines, and evaluation. For the mapping of Onchocerciasis, the country is recruiting a consultant using funds available at country level
RMNCAH ¹ : Optimise quality of care	a) Investigate and address the reasons for the decreasing coverage of postnatal care	Q4 2015		No progress reported
	b) Investigate and address the reasons for the lack of reported data on vitamin A coverage	Q2 2019		Deliverable not yet due

Equatorial Guinea has responded positively to the RMNCAH recommended actions addressing lack of data on vitamin A and low coverage of exclusive breastfeeding and DPT3. The country continues to track progress as these actions are implemented, and the country has recently increased DPT3 coverage.

Key

	Action achieved
	Some progress
	No progress
	Deliverable not yet due
