

Scorecard for Accountability and Action

Malaria transmission in Kenya ranges from intense in lowland areas to unstable epidemic-prone in the highlands. The annual reported number of malaria cases in 2016 was 8,322,500 with 603 deaths.

Metrics

Commodities Financed and Financial Control		
LLIN financing 2018 projection (% of need)	100	Target achieved or on track
Public sector RDT financing 2018 projection (% of need)	100	Target achieved or on track
Public sector ACT financing 2018 projection (% of need)	100	Target achieved or on track
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.4	Target achieved or on track
Insecticide Resistance Monitoring, Implementation and Impact		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4	Not on track
Insecticide resistance monitored since 2015 and data reported to WHO		Target achieved or on track
National Insecticide Resistance Monitoring and Management Plan		Target achieved or on track
Scale of Implementation of iCCM (2017)		Progress but more effort required
Operational LLIN/IRS coverage (% of at risk population)	100	Target achieved or on track
Reduced Malaria Incidence by >40% by 2020 (vs 2015) (projected)		Progress but more effort required
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	43	Progress but more effort required
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	64	Progress but more effort required
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	64	Progress but more effort required
% deliveries assisted by skilled birth attendant	62	Progress but more effort required
Postnatal care (within 48 hrs)	53	Progress but more effort required
Exclusive breastfeeding (% children < 6 months)	61	Target achieved or on track
Vitamin A Coverage 2015 (2 doses)	37	Not on track
DPT3 coverage 2016 (vaccination among 0-11 month olds)	78	Progress but more effort required

Malaria

Progress

Kenya has secured the resources required to sustain universal coverage of essential malaria control interventions in 2017. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Kenya has a high rating in terms of public sector management systems (CPIA cluster D). Kenya has completed the national insecticide resistance monitoring and management plan. The country is implementing iCCM. The country has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2016 was 8,322,500 with 603 deaths.

Key Challenges

- Reported malaria upsurges in Q3 2017.
- The reduced allocation for malaria from the Global Fund.

MNCH and NTDs

Progress

Kenya has achieved high coverage of the tracer MNCH intervention exclusive breastfeeding. The country has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Kenya is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Kenya is 60% for lymphatic filariasis, 42% for schistosomiasis and 60% for soil transmitted helminths. Coverage is low for trachoma (23%). Overall, the NTD preventive chemotherapy coverage index for Kenya in 2016 is 43, which represents a substantial increase compared with the 2015 index value (22).

Previous Key Recommended Action

The country has responded positively to the previous MNCH recommended action on addressing reasons for decreasing vitamin A coverage.
