

Scorecard for Accountability and Action

Malaria is endemic in all parts of Malawi. The annual reported number of malaria cases in 2016 was 5,165,386 with 4,000 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2017 projection (% of need)	100
Public sector RDT financing 2017 projection (% of need)	100
Public sector ACT financing 2017 projection (% of need)	100
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.2
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2016)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in malaria incidence rate (2010–2016)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	89
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	66
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	48
% deliveries assisted by skilled birth attendant	90
Postnatal care (within 48 hrs)	39
Exclusive breastfeeding (% children < 6 months)	61
Vitamin A Coverage 2015 (2 doses)	16
DPT3 coverage 2016 (vaccination among 0-11 month olds)	84

## Malaria

### Progress

Malawi has secured sufficient resources to finance the ACTs, RDTs and LLINs required for 2017. Sufficient LLINs have been procured to achieve 100% operational coverage of LLINs. Malawi has scaled up iCCM. Malawi has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. The country has also developed an insecticide resistance monitoring and management plan. Malawi has significantly enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control Scorecard.

### Impact

The annual reported number of malaria cases in 2016 was 5,165,386 with 4,000 deaths.

## MNCH

### Progress

High coverage has also been obtained for the tracer MNCH interventions, including coverage of skilled birth attendants and exclusive breastfeeding. The country has recently increased coverage of ARTs in the total population. Malawi has significantly enhanced the tracking and accountability mechanisms with the development and launch of the Reproductive, Maternal, Newborn, Adolescent and Child Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Malawi is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Malawi is high for lymphatic filariasis (100%), onchocerciasis (83%), schistosomiasis (96%), soil transmitted helminths (88%), and trachoma (79%). Overall, the NTD preventive chemotherapy coverage index for Malawi in 2016 is 89, which represents a slight increase compared with the 2015 index value (84).

### Previous Key Recommended Action

Malawi has responded positively to the MNCH recommended actions addressing low coverage of postnatal care and continues to track progress as these actions are implemented.

### New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Optimise quality of care	Address the decreasing vitamin A coverage	Q4 2018

### Key

	Action achieved
	Some progress
	No progress
