

## Scorecard for Accountability and Action

Malaria transmission in Nigeria takes place all year round in the south but is more seasonal in the northern regions. The annual reported number of malaria cases in 2017 was 18,690,954 cases.

### Metrics

Commodities Financed and Financial Control		
LLIN financing 2019 projection (% of need)		65
Public sector RDT financing 2019 projection (% of need)		92
Public sector ACT financing 2019 projection (% of need)		27
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)		2.8
Insecticide Resistance Monitoring, Implementation and Impact		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		4
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)	▲	76
Change in Estimated Malaria Incidence(2010–2017)		
Change in Estimated Malaria Mortality rate(2010–2017)		
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)		60
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2018)		53
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2018)		35
% deliveries assisted by skilled birth attendant		43
Postnatal care (within 48 hrs)	▲	42
Exclusive breastfeeding (% children < 6 months)	▲	29
Vitamin A Coverage 2017 (2 doses)	▲	83
DPT3 coverage 2017 (vaccination among 0-11 month olds)		42

## Malaria

### Progress

Nigeria has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has recently finalised the development of the national insecticide resistance monitoring and management plan. Nigeria has enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control and Elimination Scorecard. Nigeria has decreased the estimated malaria mortality rate by more than 40% since 2010. The country is also showing leadership in malaria control through its participation in the High Burden High Impact approach.

### Impact

The annual reported number of malaria cases in 2017 was 18,690,954.

### Key Challenge

- Funding gaps to achieve and sustain universal coverage of all malaria interventions in 2019-2020.

### Previous Key Recommended Actions

Nigeria has responded positively to the previous recommended actions addressing insufficient resources to fully implement the essential malaria control interventions, and continues to track progress as these actions are implemented.

## RMNCAH and NTDs

### Progress

Nigeria has achieved high coverage of vitamin A, and has recently increased coverage of exclusive breastfeeding and postnatal care.

Progress in addressing Neglected Tropical Diseases (NTDs) in Nigeria is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Nigeria is good for onchocerciasis (80%), for schistosomiasis (74%), for soil transmitted helminths (71%), for lymphatic filariasis (62%). The coverage is low for trachoma (30%). Overall, the NTD preventive chemotherapy coverage index for Nigeria in 2017 is 60, which represents a substantial increase compared with the 2016 index value (48).

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH <sup>1</sup> : Optimise quality of care	a. Work to accelerate coverage of ARTs in the total population and in children under 14 years of age	Q1 2017		Nigeria has achieved an ART coverage in the total population of 54%, and 35% in children. Nigeria has developed a national paediatric ART acceleration plan aligned to 90-90-90 (2016-2018/9) and has shifted policy to Test-and-Treat for all children and Option B+ for PMTC T. HIV programme integration is ongoing within routine child health care tools for iCCM

<sup>1</sup> RMNCAH metrics, recommended actions and response tracked through WHO

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH <sup>1</sup> : Optimise quality of care	b. Investigate and address the reasons for the decreasing coverage of postnatal care	Q4 2018	■	Nigeria has significantly increased postnatal care coverage
	c. Investigate and address the reasons for the reported decrease in vitamin A coverage	Q2 2019		Nigeria has significantly increased vitamin A coverage

Nigeria has responded positively to the RMNCAH recommended actions addressing low coverage of skilled birth attendants and continues to track progress as these actions are implemented.
