

Sudan ALMA Quarterly Report

Quarter Three, 2019

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control	
LLIN financing 2019 projection (% of need)	62
Public sector RDT financing 2019 projection (% of need)	100
Public sector ACT financing 2019 projection (% of need)	100
World Bank rating on public sector management and institutions 2018 (CPIA Cluster D)	2.1
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of ICCM (2017)	
Operational LLINIRS coverage (% of at risk population)	▲ 100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	12
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2018)	15
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2018)	15
% deliveries assisted by skilled birth attendant	78
Postnatal care (within 48 hrs)	27
Exclusive breastfeeding (% children < 6 months)	55
Vitamin A Coverage 2017 (2 doses)	20
DPT3 coverage 2018 (vaccination among 0-11 month olds)	93

Malaria transmission in Sudan is low-to-moderate and occasionally epidemic. The annual reported number of malaria cases in 2017 was 1,368,585 with 1,446 deaths.

Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data
	Not applicable

Malaria

Progress

Sudan has financed the required ACTs and RDTs required to sustain high coverage in 2019. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has completed the insecticide resistance monitoring and management plan. The country has procured sufficient LLINs and carried out IRS to achieve operational vector control coverage of the targeted at risk population. Sudan has also scaled up the implementation of iCCM. The country has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2017 was 1,368,585 with 1,446 deaths.

Key Challenges

- Insecticide resistance threatens vector control.
- Gaps in funding for IRS.
- Increases in cases and deaths observed between 2010 and 2017.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Enact high level policy and strategy change	Improve rule-based governance, quality of budgetary and financial management, efficiency of revenue mobilisation, quality of public administration, and transparency and accountability in the public sector	Q2 2014		No progress reported

The country has responded positively to the recommended actions on addressing the reasons for the increase in estimated malaria incidence and malaria mortality rate between 2010 and 2017.

RMNCAH and NTDs

Progress

Sudan has achieved high coverage of the tracer RMNCAH indicator skilled birth attendants, exclusive breastfeeding and DPT3. The country has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Sudan is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Sudan is high for onchocerciasis (92%), good for trachoma (60%), but low for schistosomiasis (34%), and for lymphatic filariasis (15%). The coverage is very low for soil transmitted helminths (0%). Overall, the

NTD preventive chemotherapy coverage index for Sudan in 2017 is 12, which represents a decrease compared with the 2016 index value (19). The country has enhanced tracking and accountability mechanisms with the development of the first NTD Scorecard.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Optimise quality of care	Investigate and address the reasons for the low coverage of vitamin A	Q2 2020		Deliverable not yet due

Sudan has responded positively to the NTD recommended action addressing low coverage of NTD preventive chemotherapy, and continues to track progress as these actions are implemented. Sudan has responded positively to the RMNCAH recommended action addressing low coverage of postnatal care and coverage of ARTs and continues to track progress as this action is implemented.

Key

	Action achieved
	Some progress
	No progress
	Deliverable not yet due
