

Scorecard for Accountability and Action

The entire population of Togo is at high risk of malaria. The annual reported number of malaria cases in 2017 was 1,209,034 and 995 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2019 projection (% of need)	100
Public sector RDT financing 2019 projection (% of need)	100
Public sector ACT financing 2019 projection (% of need)	100
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	2.8
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of ICCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	84
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)	57
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)	30
% deliveries assisted by skilled birth attendant	45
Postnatal care (within 48 hrs)	71
Exclusive breastfeeding (% children < 6 months)	57
Vitamin A Coverage 2016 (2 doses)	9
DPT3 coverage 2017 (vaccination among 0-11 month olds)	90

Malaria

Progress

Togo has secured sufficient resources to fund the LLINs, RDTs and ACTs required in 2019. The country has distributed sufficient LLINs to achieve 100% operational coverage. Togo has finalised the national insecticide resistance monitoring and management plan. Togo has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard.

Impact

The annual reported number of malaria cases in 2017 was 1,209,034 and 995 deaths.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Investigate and address the reasons for the increase in estimated malaria incidence between 2010 and 2017	Q4 2019		Deliverable not yet due

Togo has responded positively to the recommended action on monitoring national insecticide resistance and continues to track progress as this action is implemented

RMNCAH and NTDs

Progress

Togo achieved high coverage of the tracer RMNCAH intervention exclusive breastfeeding and DPT3 vaccination.

Progress in addressing Neglected Tropical Diseases (NTDs) in Togo is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, and soil transmitted helminths. Preventive chemotherapy coverage in Togo is high for lymphatic filariasis (100%), schistosomiasis (100%) and soil transmitted helminths (100%). Coverage is good for onchocerciasis (50%) Overall, the NTD preventive chemotherapy coverage index for Togo in 2017 is 84, which represents an increase compared with 2016 (77).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
NTDs	Clarify the trachoma situation and initiate treatments or constitute an elimination dossier	Q4 2019		Deliverable not yet due

Togo has responded positively to the RMNCAH recommended action addressing low coverage of ARTs in children, skilled birth attendants and vitamin A and continues to track progress as these actions are implemented.
