

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control

LLIN financing 2016 projection (% of need)	70
Public sector RDT financing 2016 projection (% of need)	100
Public sector ACT financing 2016 projection (% of need)	100
World Bank rating on public sector management and institutions 2014 (CPIA Cluster D)	

Insecticide Resistance Monitoring, Implementation and Impact

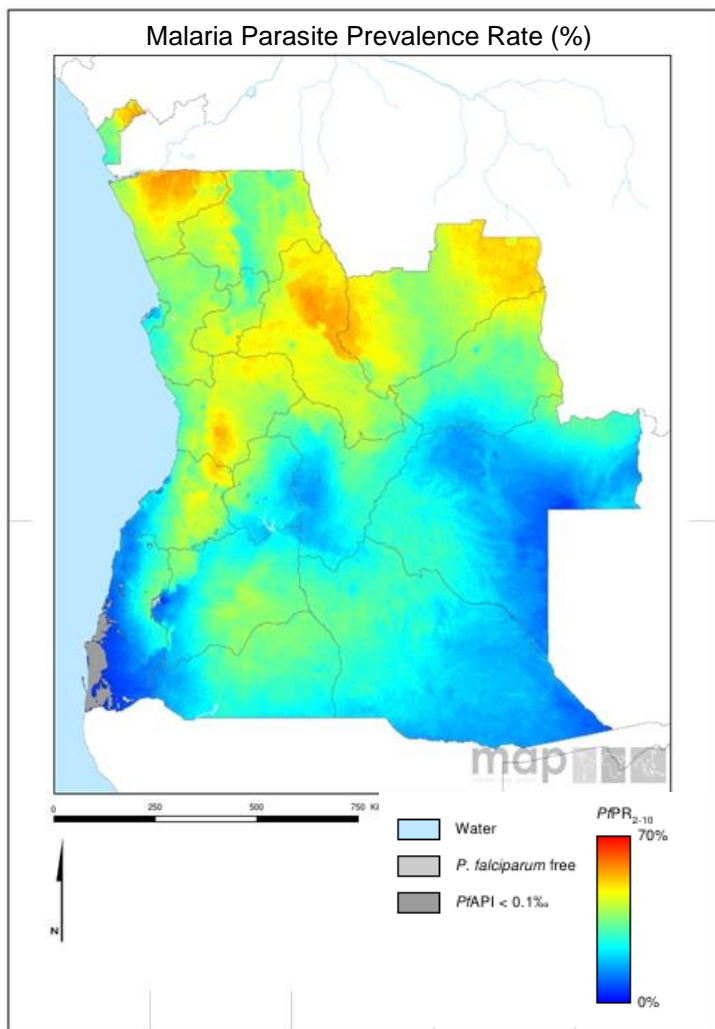

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2013)	
Operational LLIN/IRS coverage (% of at risk population)	61
>75% Decrease in Malaria Incidence Projected 2000–2015	

Tracer Indicators for Maternal and Child Health

Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2015)	29
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2015)	24
% deliveries assisted by skilled birth attendant	47
Postnatal care (within 48 hrs)	
Exclusive breastfeeding (% children < 6 months)	
Vitamin A Coverage 2013 (2 doses)	48
DPT3 coverage 2014 (vaccination among 0-11 month olds)	80

The entire population of Angola is at risk of malaria. The annual reported number of suspected malaria cases in 2014 was 3,180,021 with 5,714 deaths.

Malaria

Progress

Angola has reprogrammed and re-prioritised its resources, filling the majority of the malaria commodity gaps previously identified. The country has carried out insecticide resistance monitoring since 2014 and has reported the results to WHO.

Impact

Angola reported 3,180,021 malaria cases with 5,714 malaria deaths in 2014. The number of malaria deaths decreased from 7,300 in 2013. WHO, through modeling, estimates Angola has achieved a 50%-75% decrease in incidence between 2000 and 2015.

Key Challenges

- The country has documented mosquito resistance to three insecticide classes.
- Malaria upsurges have been reported.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Vector Control	Given the reported mosquito resistance to 3 classes of insecticide, urgently finalise and implement the national insecticide resistance monitoring and management plan	Q1 2017		Deliverable not yet due

The country has responded positively to finalising the policy on Community Case Management of malaria and pneumonia as well as ensuring that resources are allocated to malaria control at a high level that is sufficient to ensure universal coverage of key interventions, including through enhanced domestic resource commitments.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address malaria upsurge	Investigate and address the reasons for the increase in malaria cases	Q4 2016

MNCH

Progress

The country plans to pilot integrated Community Case Management in three provinces starting from 2016, including use of ACTs and antibiotics at community level. Angola has achieved high coverage of the tracer MNCH intervention DPT3.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	Work to accelerate coverage of ARTs especially in children under 14 years of age	Q1 2017		Deliverable not yet due but the country reports a 4% increase in ART coverage in the whole population and a 6% increase in children

Angola has responded positively to the MNCH recommended actions addressing the lack of data on exclusive breastfeeding and postnatal care and continues to track progress as these actions are implemented.
