

Scorecard for Accountability and Action

In Cabo Verde, 58% of the population lives in areas where there is a low risk of malaria; the rest of the country is malaria-free. The annual reported number of malaria cases in 2021 was 21 with zero deaths.

Metrics

Commodities Financed		
IRS financing 2023 (% of at-risk population)		100
Public sector RDT financing 2023 projection (% of need)		100
Public sector ACT financing 2023 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA instrument at the AUC	▲	
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Zero Malaria Starts With Me Launched		
End Malaria Council and Fund Launched		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		2
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
IRS Operational Coverage (%)		80
On track to reduce case incidence by ≥40% by 2021 (vs 2015)		
On track to reduce case mortality by ≥40% by 2021 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of ICCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)		0
Estimated % of children (0-14 years old) living with HIV who have access to antiretroviral therapy (2022)		86
Vitamin A Coverage 2022 (2 doses)		
DPT3 coverage 2022 (vaccination among 0-11 month olds)		93

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard Cabo Verde secured sufficient resources to sustain universal coverage of ACTs, RDTs and IRS in 2023. The country has completed the insecticide resistance management and implementation plan and has submitted insecticide resistance data to WHO. Cabo Verde has more than six months of stocks of ACTs and RDTs. The country recently launched their Zero Malaria Stats with Me campaign. WHO identified Cabo Verde as being a country with the potential to eliminate local transmission of malaria by 2025.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, the country has developed a Malaria Elimination Scorecard but this is not up to date or posted to the ALMA Scorecard Knowledge Hub.

Impact

The annual reported number of malaria cases in 2021 was 21 with zero deaths.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Policy	Sign, ratify and deposit the AMA instrument at the AUC	Q1 2023		No progress reported

RMNCAH and NTDs

Progress

The country has achieved high coverage of the tracer RMNCAH interventions of DPT3 and ART coverage in children under 14 years of age.

Progress in addressing Neglected Tropical Diseases (NTDs) in Cabo Verde is measured using preventive chemotherapy coverage achieved for soil transmitted helminths. Preventive chemotherapy coverage for soil transmitted helminths is zero (0%). The overall NTD preventive chemotherapy coverage index for Cabo Verde is 0 in 2021, which represents a very substantial decrease compared with the 2020 index value (55).

Previous Key Recommended Actions

Cabo Verde has responded positively to the RMNCAH recommended actions addressing lack of data on vitamin A and low coverage of preventive chemotherapy and continues to track progress as these actions are implemented.
