

### Scorecard for Accountability and Action

The entire population of the Republic of the Congo is at high risk of malaria and transmission is intense all year round. The annual reported number of malaria cases in 2021 was 321,404 with 252 deaths.

#### Metrics

Commodities Financed	
LLIN financing 2023 projection (% of need)	100
Public sector RDT financing 2023 projection (% of need)	100
Public sector ACT financing 2023 projection (% of need)	100

Policy	
Signed, ratified and deposited the AMA Instrument at the AUC	▲
Malaria activities targeting refugees in Malaria Strategic Plan	
Malaria activities targeting IDPs in Malaria Strategic Plan	
Zero Malaria Starts With Me Launched	
End Malaria Council and Fund Launched	

Resistance Monitoring, Implementation and Impact	
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
RDTs in stock (>6 months stock)	
ACTs in stock (>6 months stock)	
LLIN/IRS campaign on track	
Operational LLIN/IRS coverage (% of at risk population)	100
On track to reduce case incidence by ≥40% by 2021 (vs 2015)	
On track to reduce case mortality by ≥40% by 2021 (vs 2015)	

Tracer Indicators for Maternal and Child Health, NTDs and Covid 19	
Scale of Implementation of iCCM	
Mass Treatment Coverage for Neglected Tropical Disease (NTD Index, %)(2021)	48
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)	13
Vitamin A Coverage 2022 (2 doses)	6
DPT3 coverage 2022 (vaccination among 0-11 month olds)	78

#### Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data
	Not applicable

## Malaria

### Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Congo secured sufficient resources to cover the required needs for ACTs, RDTs and LLINs required in 2023. The country has scaled up iCCM coverage. The country has recently reported the results of insecticide resistance monitoring to WHO and has carried out drug resistance testing since 2018 and has reported the results to WHO.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Congo has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, however this scorecard has not yet been shared through the ALMA Scorecard Hub. The NTD country scorecard has been shared through the Scorecard Hub. The country should consider establishing an End Malaria Council and Fund to enhance domestic resource mobilization and multi-sectoral action.

### Impact

The annual reported number of malaria cases in 2021 was 321,404 with 252 deaths.

### Key Challenge

- Low coverage of essential interventions due to lack of external and domestic resources.

### Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Policy	Work to incorporate activities targeting refugees and or IDPs in the Malaria Strategic Plan	Q1 2023		The NMCP has prepared the first draft of the new NSP and IDPs, refugees and other hard to reach populations were considered including the provision of access to malaria health services and ITNs

## RMNCAH and NTDs

### Progress

The country has enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Congo is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis and soil transmitted helminths. Preventive chemotherapy coverage in Congo is low for schistosomiasis (35%), soil transmitted helminths (47%) and for lymphatic filariasis (50%). It is good for onchocerciasis (66%). Overall, the NTD preventive chemotherapy coverage index for Congo in 2021 is 48 and this represents a substantial increase compared with the 2020 index value (34). The country has enhanced the tracking and accountability mechanisms with the development of the NTD scorecard.

### Previous Key Recommended Actions

Congo has responded positively to the RMNCAH recommended action addressing low coverage of ARTs in children, and lack of data on vitamin A and continues to track progress as these actions are implemented.
