

Scorecard for Accountability and Action

The entire population of Guinea is at risk of malaria. The annual reported number of malaria cases in 2021 was 2,422,374 with 1,117 deaths.

Metrics

Commodities Financed		
LLIN financing 2023 projection (% of need)		100
Public sector RDT financing 2023 projection (% of need)		100
Public sector ACT financing 2023 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Zero Malaria Starts With Me Launched		
End Malaria Council and Fund Launched		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		3
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)		100
On track to reduce case incidence by ≥40% by 2021 (vs 2015)		
On track to reduce case mortality by ≥40% by 2021 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of ICM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)		20
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)		31
Vitamin A Coverage 2022 (2 doses)		97
DPT3 coverage 2022 (vaccination among 0-11 month olds)		47

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Guinea has secured sufficient resources for the ACTs, RDTs and LLINs required in 2023. The country has completed the national insecticide resistance monitoring and management plan, carried out insecticide resistance monitoring since 2015 and has reported the results to WHO, and has carried out drug resistance testing since 2018 and has reported the results to WHO. Guinea has procured sufficient LLINs to achieve universal operational coverage of the targeted at-risk population.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, the country has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, although this scorecard is not yet shared on the ALMA Scorecard Hub. The country has also recently developed their NTD scorecard. Guinea is working on the launch of the End Malaria Council and Fund.

Impact

The annual reported number of malaria cases in 2021 was 2,422,374 with 1,117 deaths.

Key Challenge

- Insufficient resources to fully implement the national strategic plan.

RMNCAH and NTDs

Progress

Guinea has achieved high coverage of vitamin A.

Progress in addressing Neglected Tropical Diseases (NTDs) in Guinea is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. In 2021, preventive chemotherapy coverage was 100% for schistosomiasis, 74% for onchocerciasis, 69% for lymphatic filariasis, 65% for soil-transmitted helminths and 0% for trachoma. Overall, the NTD preventive chemotherapy coverage index for Guinea in 2021 is 20, which represents a very substantial decrease compared with the 2020 index value of 73. The country has enhanced the tracking and accountability mechanisms with the development of the NTD scorecard.

Previous Key Recommended Actions

Guinea has responded on the recommended actions on low coverage of ARTs in children, and NTD MDA coverage.
