

Scorecard for Accountability and Action

Malaria transmission is most intense in the south whilst the desert areas in the north are malaria-free. The annual reported number of malaria cases in 2021 was 4,659,909 with 4,430 deaths.

Metrics

Commodities Financed		
LLIN financing 2023 projection (% of need)	92	
Public sector RDT financing 2023 projection (% of need)	71	
Public sector ACT financing 2023 projection (% of need)	65	
Policy		
Signed, ratified and deposited the AMA instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Zero Malaria Starts With Me Launched		
End Malaria Council and Fund Launched		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)	100	
On track to reduce case incidence by ≥40% by 2021 (vs 2015)		
On track to reduce case mortality by ≥40% by 2021 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of ICCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)	11	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)	39	
Vitamin A Coverage 2022 (2 doses)	87	
DPT3 coverage 2022 (vaccination among 0-11 month olds)	84

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. The country has procured sufficient LLINs to achieve universal operational coverage of the targeted population. The country has adequate stocks of ACTs and RDTs. Niger has completed the national insecticide resistance monitoring and management plan and has recently reported the results of insecticide resistance testing to WHO. The country is also showing leadership in malaria control through its participation in the High Burden High Impact approach. Niger has launched its Zero Malaria Starts with Me campaign.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, the country has enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control Scorecard, although the scorecard is not yet posted to the ALMA Scorecard Hub. The country is developing a concept note for the End Malaria Council.

Impact

The annual reported number of malaria cases in 2021 was 4,659,909 with 4,430 deaths.

Key Challenges

- Insufficient resources to achieve high coverage of essential malaria interventions.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Resource Mobilisation	Work to fill key gaps in malaria funding	Q2 2024		Deliverable not yet due
Stocks	Work to ensure there are sufficient stocks of ACTs and RDTs	Q4 2023		Deliverable not yet due

Niger has responded positively to the recommended action addressing drug resistance monitoring and continues to track progress as this action is implemented.

RMNCAH and NTDs

Progress

Niger has achieved high coverage of the tracer RMNCAH intervention vitamin A. The country has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Niger is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, schistosomiasis, soil transmitted helminths and trachoma. In 2021, preventive chemotherapy coverage was 100% for soil transmitted helminthiasis, 58% for schistosomiasis, 28% for trachoma and 0% for lymphatic filariasis. Overall, the NTD preventive chemotherapy coverage index for Niger in 2021 is 11, which represents a very substantial decrease compared with the 2020 index value of 61.

Previous Key Recommended Actions

Niger has responded positively to the RMNCAH recommended actions addressing low coverage of ARTs in children, with a 2% increase in coverage over the last year, and

continues to track progress as actions are implemented.
