

Scorecard for Accountability and Action

The entire population of Togo is at high risk of malaria. The annual reported number of malaria cases in 2019 was 2,406,091 and 1,275 deaths.

Metrics

Commodities Financed		
LLIN financing 2022 projection (% of need)		100
Public sector RDT financing 2022 projection (% of need)		100
Public sector ACT financing 2022 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		4
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)		100
On track to reduce case incidence by ≥40% by 2020 (vs 2015)		
On track to reduce case mortality by ≥40% by 2020 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of ICCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2020)		86
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021)		49
Vitamin A Coverage 2020 (2 doses)		91
DPT3 coverage 2021 (vaccination among 0-11 month olds)		83
% Population Fully Vaccinated Against COVID-19		18

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, New-born, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is encouraged to complete this process. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID-19 vaccines and had only been able to cover 18% of their population by October 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria

Progress

Togo has secured sufficient resources to fund the LLINs, RDTs and ACTs required in 2022. The country has distributed sufficient LLINs to achieve 100% operational coverage of the targeted at-risk population. Togo has finalised the national insecticide resistance monitoring and management plan and has reported the results of insecticide resistance monitoring and management plan.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Togo has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, although the scorecard is not yet shared on the ALMA Scorecard Hub.

Impact

The annual reported number of malaria cases in 2019 was 2,406,091 and 1,275 deaths.

Key Challenge

- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2022		The country in collaboration with WHO continued the process of the epidemiological stratification in preparation of the development of the new MSP. The fourth round of the SMC campaign was done with the support of partners including the Global Fund, UNICEF and the Malaria Consortium. Key malaria activities were implemented, and the country did not face stock out of ACT and RDT during the Q3. Preparation of the ZMSWM campaign is on going.

Togo has responded positively to the recommended action on monitoring national insecticide resistance and continues to track progress as this action is implemented.

RMNCAH and NTDs

Progress

Togo achieved high coverage of the tracer RMNCAH intervention vitamin A.

Progress in addressing Neglected Tropical Diseases (NTDs) in Togo is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, and soil transmitted helminths. In 2020, preventive chemotherapy coverage was 100% for the three diseases (lymphatic filariasis, schistosomiasis and trachoma). The coverage was 84% for onchocerciasis and 57% for soil transmitted helminths. Overall, the NTD preventive chemotherapy coverage index for Togo in 2020 is 86, which represents an increase compared with the 2019 index value (77).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2022		The country conducted monitoring and coaching of regions to support RMNCAH activity implementation.
NTDs	Ensure that NTD interventions including Mass Drug Administration, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive	Q4 2022		NTD activities are being conducted in Togo whilst respecting COVID-19 preventive measures. In addition to routine activities, the country conducted the formative supervisions of Regional and District Focal Points to be involved in post - elimination surveillance of Guinea worm. The

	guidelines during the pandemic. This includes prioritising key necessary catch up activities			country was certified as having eliminated Trachoma as a public health problem, in addition to the other diseases eliminated by the country (Lymphatic Filariasis and Human African Trypanosomiasis)
--	--	--	--	--

Togo has responded positively to the RMNCAH recommended action addressing low coverage of ARTs in children, with a 6% increase in coverage recently observed, and continues to track progress as these actions are implemented.
