

### Scorecard for Accountability and Action

In Cabo Verde, 58% of the population lives in areas where there is a low risk of malaria; the rest of the country is malaria-free. The annual reported number of imported malaria cases in 2023 was 37 with zero deaths.

#### Metrics

Financing		
IRS financing (2024-2026) (% of at-risk population)	<div style="width: 100%;"></div>	100
Public sector ACTs and RTDs financing (2024-2026) projection (% of need)	<div style="width: 100%;"></div>	100
% of National Malaria Strategic Plan Financed (2024-2026)	<div style="width: 55%;"></div>	55
Policy		
Signed, ratified and deposited the AMA instrument at the AUC	<div style="width: 100%;"></div>	
Malaria activities targeting refugees in Malaria Strategic Plan	<div style="width: 0%;"></div>	
Malaria activities targeting IDPs in Malaria Strategic Plan	<div style="width: 0%;"></div>	
Zero Malaria Starts With Me Launched	<div style="width: 100%;"></div>	
End Malaria Council and Fund Launched	<div style="width: 0%;"></div>	
Resistance Monitoring, Implementation and Impact		
Drug efficacy studies conducted since 2019 and data reported to WHO	<div style="width: 0%;"></div>	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	<div style="width: 2%;"></div>	2
Insecticide resistance monitored since 2015 and data reported to WHO	<div style="width: 100%;"></div>	
% of vector control in the last year with next generation materials	<div style="width: 100%;"></div>	100
On track to reduce malaria incidence by at least 75% by 2025 (vs 2015)	<div style="width: 100%;"></div>	
On track to reduce malaria mortality by at least 75% by 2025 (vs 2015)	<div style="width: 100%;"></div>	
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2023)	<div style="width: 0%;"></div>	0
% of Neglected Tropical Disease MDAs Achieving WHO Targets	<div style="width: 0%;"></div>	0
National Budget Allocated to NTDs	<div style="width: 0%;"></div>	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2023)	<div style="width: 98%;"></div>	98
Vitamin A Coverage 2022 (2 doses)	<div style="width: 0%;"></div>	
DPT3 coverage 2023 (vaccination among 0-11 month olds)	<div style="width: 93%;"></div>	93
Climate Change and VBDs in NDCs	<div style="width: 100%;"></div>

## **Malaria**

Africa is at the centre of a perfect storm that threatens to disrupt malaria services and undo decades of progress. We must act urgently to both prevent and mitigate the adverse effects of the ongoing global financial crisis, increasing biological threats, climate change, and humanitarian crises. These threats represent the most serious emergency facing malaria in 20 years and will lead to malaria upsurges and epidemics if not addressed. AU Member States face a \$1.5 billion gap just to sustain existing, yet inadequate, levels of malaria-related services between now and 2026. To get back on track and eliminate malaria, we will need to mobilise another \$5.2 billion dollars annually to fully finance our national malaria plans. Climate change presents a significant threat to the progress that we have made. Africa is disproportionately exposed to the risks of climate change and by the 2030s, 150 million additional people will be at risk of malaria because of warmer temperatures and increased rainfall. Climate disasters displace millions and destroy roads and health facilities, reducing access to health services. There is urgency to decarbonise and reduce our carbon footprint. We must implement integrated and multisectoral solutions, and adapt our health systems to the threats of both climate change and pandemics. We must also take action to confront the threats of insecticide and drug resistance, reduced efficacy of rapid diagnostic tests, and the *Anopheles stephensi* mosquito which spreads malaria in both urban and rural areas. The good news is that the malaria toolkit continues to expand. WHO has approved the use of dual-insecticide mosquito nets that are 43% more effective than traditional mosquito nets and will address the impact of insecticide-resistance. New medicines for treating malaria and two malaria vaccines for children have also been approved with an increasing number of countries deploying these new tools. The scaling up of these interventions will help us achieve our goal of eliminating malaria. This will require integrated approaches with malaria as a pathfinder for pandemic preparedness, climate change and health, Primary Health Care and Universal Health Coverage. We must work to sustain and increase domestic resource commitments including through multisectoral End Malaria and NTD councils and Funds, which have raised over US\$125 million

## **Progress**

Cabo Verde secured sufficient resources to sustain universal coverage of IRS in 2024-26. The country has completed the insecticide resistance management and implementation plan and has submitted insecticide resistance data to WHO. The country launched their Zero Malaria Stats with Me campaign. WHO certified Cabo Verde as being malaria free in Q1 2024. The country is congratulated for this achievement which serves as an inspiration for all malarious countries in Africa.

## **Impact**

The annual reported number of imported malaria cases in 2023 was 37 with zero deaths.

# Reproductive, Maternal, Newborn, Adolescent and Child Health

## Progress

The country has achieved high coverage of the tracer RMNCAH interventions of DPT3 and ART coverage in children under 14 years of age.

## Previous Key Recommended Actions

Cabo Verde has responded positively to the RMNCAH recommended action addressing lack of data on vitamin A and continues to track progress as these actions are implemented.

## Neglected Tropical Diseases

Progress in addressing Neglected Tropical Diseases (NTDs) in Cabo Verde is measured using preventive chemotherapy coverage achieved for soil transmitted helminths. Preventive chemotherapy coverage for soil transmitted helminths is 0% and the country didn't reach WHO target. The overall NTD preventive chemotherapy coverage index for Cabo Verde is 0 in 2023, which represents a very substantial decrease compared with the 2022 index value (59). Cabo Verde has included Vector-borne diseases in the country Nationally Determined Contribution.

## New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
NTDs	Submit data to the AUC on the national Budget Allocated to NTDs	Q4 2025
