

“We are off track in the fight against malaria. A perfect storm — insufficient resources, climate change, biological risks, and humanitarian crises — threatens our hard-won gains. To safeguard progress, we must use strategic data for targeted interventions and maximise resource use. Scorecard tools will be instrumental in strengthening accountability and driving action.”

“We also must urgently increase our domestic resources and scale up innovative financing to address the malaria funding crisis. Leveraging End Malaria Councils, the World Bank IDA, and Climate Funds to equip national programmes to drive the malaria and NTD elimination agenda forward.”

— PRESIDENT ADVOCATE DUMA GIDEON BOKO OF THE REPUBLIC OF BOTSWANA, AND CHAIR OF ALMA

“Our continent did not achieve the goal of reducing malaria incidence and mortality by 40% by 2020; a key milestone to eliminating malaria in Africa. This has been exacerbated by the COVID 19 pandemic’s impact on health services and global finances which in turn is further fuelled by conflict and instability. To spur accelerated action towards malaria elimination in Africa, the Continental Scorecard for Accountability and Action, coupled with national malaria scorecards and action trackers are critical tools in identifying key bottlenecks for sustained malaria action, advocacy, resource mobilization and promotion of accountability.”

—HIS EXCELLENCY UMARO SISSOCO EMBALÓ, FORMER PRESIDENT OF GUINEA BISSAU, ALMA CHAIR (2022-2025)
